Build Number	<b>15083</b>
Checksum (MD5) for HF1.zip	<b>afa7580dc4f411b9005ae48cf54c4177</b>

## What's in this Release?

This hotfix resolves the issue of limited number of zone attributes being displayed in WellBase.

## Hotfix Dependencies

GeoGraphix 2015.1 must be installed along with Service Pack 2015.1.2 prior to the Hotfix installation.

## Fixed Issue

WellBase

ID	Issue Description	Fix Description
103604	The Zones tab does not display all attributes, even with filters applied.	All attributes in the Zones page display based on the attributes selected. This issue is fixed by using alternative data structure to show an unlimited number of zone attributes.

## Installation Instructions

To install this hotfix:

1. Both Discovery 2015.1 and Service Pack 2015.1.2 must be installed.
2. Shutdown all running GeoGraphix 2015.1 applications and services.
3. Download the hotfix installer to a folder on your hard drive.
4. Select **DeployHotFix.exe**, and then click **Run as Administrator** from the context menu.

## Files Updated

WellBase

1. WellBase.exe (32-bit) version 16.1.15083.1

**Note:** To view the file version, right-click the file, and select the **Properties** option from the shortcut menu. The **Properties** dialog displays. Select the **Details** tab.

## DISCLAIMER

If you have any questions or encounter any problems, please visit the **LMKR Support website**:

<http://support.lmkr.com>

Or, contact Customer Support in your region. Refer to the section [Contacting LMKR](#) for details.

## Contacting LMKR

Our new dedicated system is accessible via local call-in numbers\* and is an alternative way for you to submit a technical support case and/or speak directly with a GeoGraphix Support Analyst.

## Support via Web Portal

You can also submit a support request directly to LMKR Customer Support by registering a case through the **LMKR Customer Support Portal**: <http://support.lmkr.com>

To request support in the LMKR Customer Support Portal:

1. In the main support page, **login** using your registered email and password. Please register your email before you access the site.
2. Select the **Case Management** tab or use the **Manage Cases** link on the main support page.
3. In the **Case Management** tab, click the **Create a New Case** link.
4. In the **Create Case** page, fill in the necessary information. Provide details about your technical concern, including any error messages, the workflow steps where the problem occurred, and attach screenshot that display the problem. You can also attach other files, such as example data files, which may help understanding the issue
5. Click the **Create Case** button. A support analyst in the nearest Technical Assistance Center will respond to your request.

We will ensure a quick and satisfactory answer to your query. If the problem cannot be resolved over the phone at the regional level, an escalation team will take over the resolution of your support case and will get back to you without delay.
