GVERSE GeoGraphix® CERTIFICATIONS

WHY SHOULD YOU ATTEND?

These certifications are designed to test your knowledge and concepts of Geoscience exploration ranging from Data and Project Management to petrophysical analysis with GVERSE GeoGraphix. Successful candidates demonstrate their ability to effectively utilize GVERSE GeoGraphix applications along with preparing projects for higher geoscience workflows in all modules.

BENEFITS

- Allows for career growth - higher probability of being hired when changing jobs
- Certification program provides a gap between a standard software user and a certified user who has extensive knowledge on certain modules
- Staying relevant by taking certifications each time a new release is out

WHO SHOULD ATTEND?

- Individuals interested in excelling in their careers.
- Individuals seeking to gain knowledge about geoscience workflows.

LEARNING OBJECTIVES

- Free/Paid Online trainings recommended prior to taking exam:
  - Setting up projects
  - Getting started with well interpretations
  - Getting started with GVERSE Geophysics
- Free trial test is available for self-assessment before proceeding to the exam (un-proctored test)
- Wide range of documents and videos available on the GVERSE website

PREREQUISITES

- Geoscientists, Geo-techs, Geologists, Geophysicists, Petrophysicists
- Previous experience with geoscience software or database will be helpful

EXAMINATION

- Exam will be taken online using virtual machines and will be monitored
- Dataset will be given to users to test their concepts and software skills
- Exam will be in three sections; workflows, troubleshooting, and MCQ's
