Introduction

LMKR is pleased to announce the release of the GVERSE™ Geomodeling 2017.1. The GVERSE Geomodeling application is an integrated environment for modeling that incorporates existing mapping and cross section features of smartSECTION® with the 3D view. It takes your smartSECTION interpretations to a whole new level with 3D modeling, while also enabling you to fully utilize the existing smartSECTION features. The application is part of the GVERSE application suite by LMKR (<http://www.lmkr.com/gverse>).

LMKR GVERSE consists of geoscience and engineering solutions focused on workflow optimization and enhancing the productivity of the teams working on diverse geological and geophysical projects. These applications help cut the processing time required for interpretations resulting in fast, easy to use scalable tools that are inter-operable with other known geoscience software suites; enabling a connected multi skilled workforce.

This document guides you through the installation and license configuration processes of Geomodeling.

System Requirements

The following sections list the system requirements for the Geomodeling.

Software

The software that must be installed on the system running the application are as follows:

- GeoGraphix Discovery 2017.1
- LMKR License Management Tool 2016.1 for GVERSE Geomodeling license
The LMKR License Management Tool (LMT) must be installed to configure the license.
- Microsoft DirectX End-User Runtime (June 2010)
- Adobe Reader for selected help files (optional)

Operating System

To run the application, you need one of the following operating systems installed on your system:

- Windows® 7 Professional x64
- Windows® 7 Enterprise x64
- Windows® 7 Ultimate x64
- Windows® 10 Professional x64
- Windows® 10 Enterprise x64

Note: It is recommend to use the latest Microsoft® service packs and security patches. Geomodeling specifically requires Windows platform update KB2670838 installed on the machine, in case the operating system is Windows 7.

Hardware

The hardware requirements for this application are the same as the GeoGraphix hardware requirements.

Note: To run Geomodeling, it is recommended that an NVIDIA DirectX 11 compatible card be used. We recommend using the latest video drivers and Microsoft updates for your system.

Licenses

The following licenses are required to run the application:

- GeoGraphix Discovery 2017.1 license
- GVERSE Geomodeling 2017.1 license
The GVERSE Geomodeling license is required to enable Model 3D view and Contours on Map view. Also note that FrameBuilder™ is part of the GVERSE Geomodeling license.

Note: Refer to the LMKR Customer Support Portal (<http://support.lmkr.com/>) for up-to-date information on the requirements.

Installation

This section guides you through the installation and uninstallation processes of the Geomodeling application.

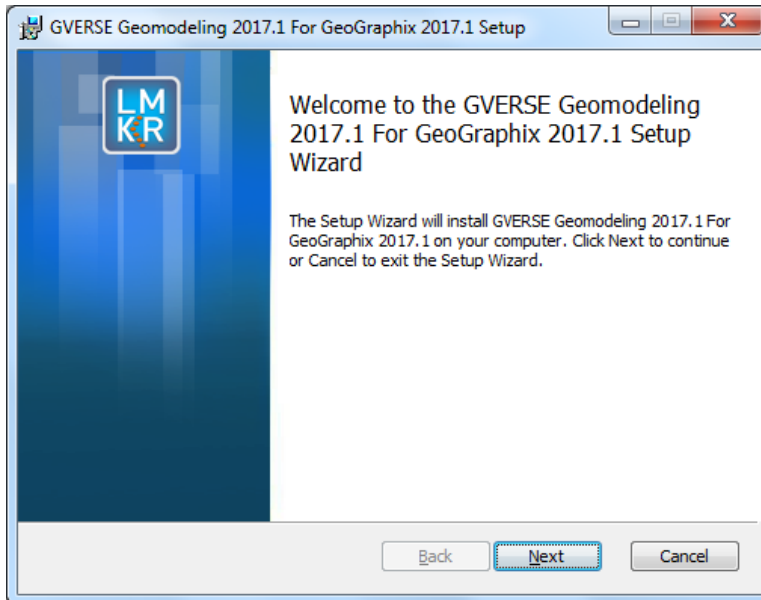

Installing GVERSE Geomodeling

Geomodeling can be installed while installing GeoGraphix 2017.1. This is the recommended installation method. For details on installing Geomodeling along with GeoGraphix, refer to the [GeoGraphix Installation Guide](#) on the LMKR Support Portal.

If you opted not to install Geomodeling along with GeoGraphix, then refer to the following steps.

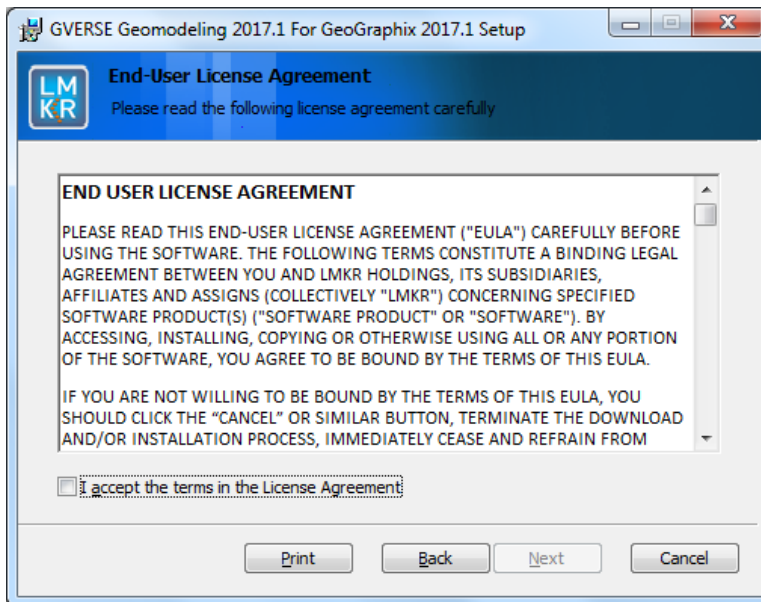

1. Prior to installation, please make sure that GeoGraphix 2017.1 is installed and shut down on the system.
 2. You can either:
 - Select **Start > LMKR > GVERSE > Install/Uninstall Geomodeling** if GeoGraphix 2017.1 is already installed.
- Or
- Download the Geomodeling setup file from **LMKR Support Portal - Downloads** page (<http://support.lmkr.com/>). Navigate to the location where you downloaded the installation setup, and then double-click on the Geomodeling 2017.1 setup file.

The Welcome to the GVERSE Geomodeling Setup Wizard dialog displays.

3. Click **Next**.

The End User License Agreement dialog displays.

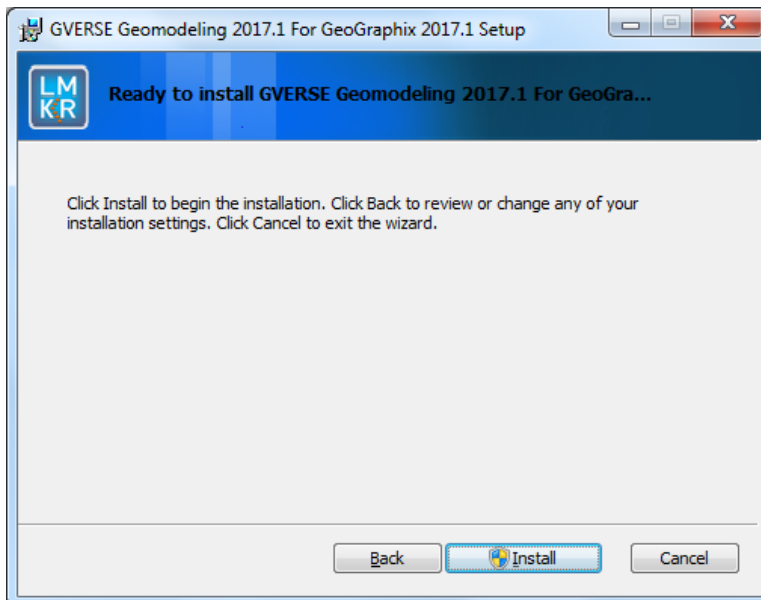

4. If you agree to the license agreement, then select **I accept the terms in the License Agreement**.

The Destination Folder dialog displays. This dialog shows the path where the Geomodeling application is going to be installed on the computer. It is recommended to use the default path for installation.

5. Click **Next**.

The Ready to Install GVERSE Geomodeling dialog displays.

6. Click **Install** to continue with the installation.

The installation process initiates and the dialog displays the installation progress.

When the installation finishes, the Completed GVERSE Geomodeling Setup Wizard dialog displays.

7. Click **Finish** to exit the wizard.
8. After successful installation of Geomodeling:
 - The Geomodeling icon replaces the smartSECTION® icon in the GeoGraphix toolbar.
 - The smartSECTION functionality (Map and Cross Section views) remains the same, and is available as part of Geomodeling without requiring any new license.
 - All new features of smartSECTION also become available in Geomodeling.

Uninstalling GVERSE Geomodeling

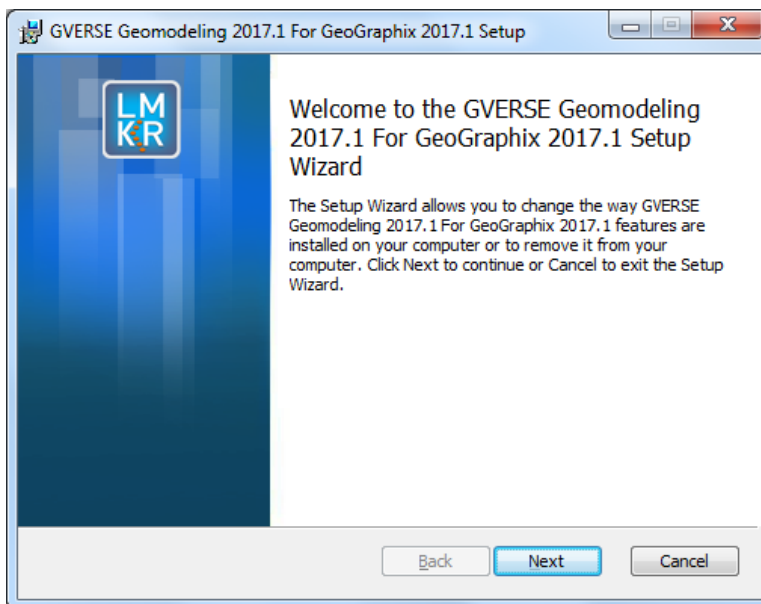

Geomodeling is automatically uninstalled on uninstalling GeoGraphix 2017.1. This uninstallation method is recommended. For details on uninstalling GeoGraphix, refer to the [GeoGraphix Installation Guide](#) on the LMKR Support Portal.

Please note that to use smartSECTION features, you do not need to uninstall Geomodeling as smartSECTION functionality (Map and Cross Section views) remains the same and is available as part of Geomodeling without requiring any new license.

To uninstall Geomodeling only, refer to the following steps.

1. GeoGraphix must be shut down before removing Geomodeling.
2. You can either:
 - Select **Start > LMKR > GVERSE > Install/Uninstall Geomodeling**.Or
 - Navigate to the location where you downloaded the installation setup, and then double-click on the Geomodeling 2017.1 setup file.

The Welcome to the GVERSE Geomodeling Setup Wizard dialog displays.

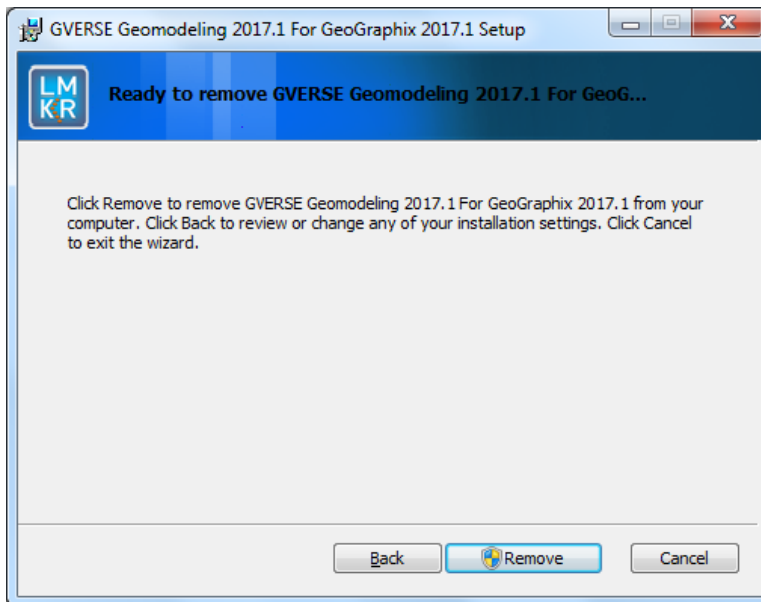

3. Click **Next**.

The Change, Repair, or Remove installation dialog displays.

4. Click **Remove**.

The Ready to Remove GVERSE Geomodeling dialog displays.

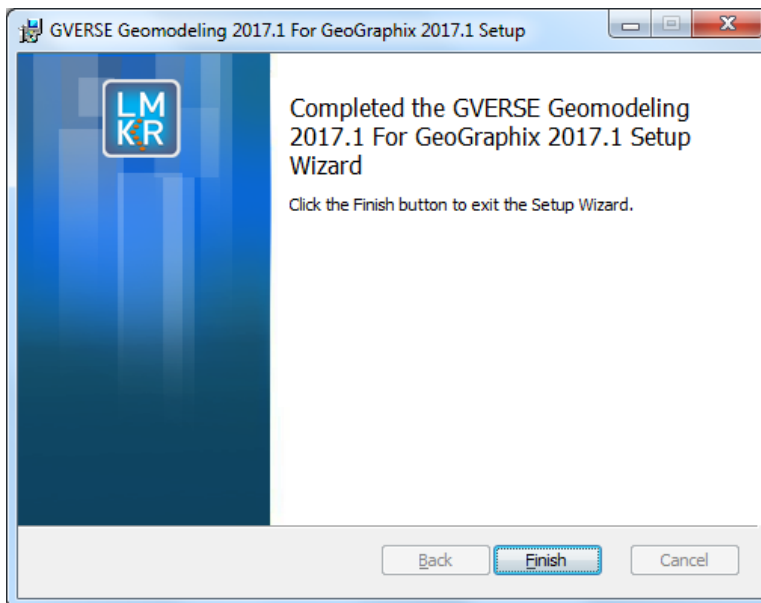

5. Click **Remove**.

The uninstall process initiates and the dialog displays the uninstallation progress.

Once the application is uninstalled from your system, the Completed the GVERSE Geomodeling Setup Wizard dialog displays.

6. Click **Finish** to exit the wizard.

Post-Uninstallation Step

You need to add the following registry in the Registry Editor to ensure that the smartSECTION icon appears in ProjectExplorer:

[HKEY_LOCAL_MACHINE\SOFTWARE\WOW6432Node\GeoGraphix\Installed Modules\smartSECTION]

"AppName"="smartSECTION"

"Type"=dword:00000007

 AppName	REG_SZ	smartSECTION
 Type	REG_DWORD	0x00000007 (7)

Licensing

To access all of the Geomodeling features, you need a valid LMKR license. This license is required to enable Model 3D view and Contours on Map view. The smartSECTION functionality (Map and Cross Section views) remains the same, and is available as part of Geomodeling without requiring any new license. Also note that FrameBuilder is part of the GVERSE Geomodeling license.

Please contact COS@lmk.com to request a license. Once you receive the license, use the LMT to configure it for a single system or to set up a network license on a server. This can be done either before or after the Geomodeling application installation.

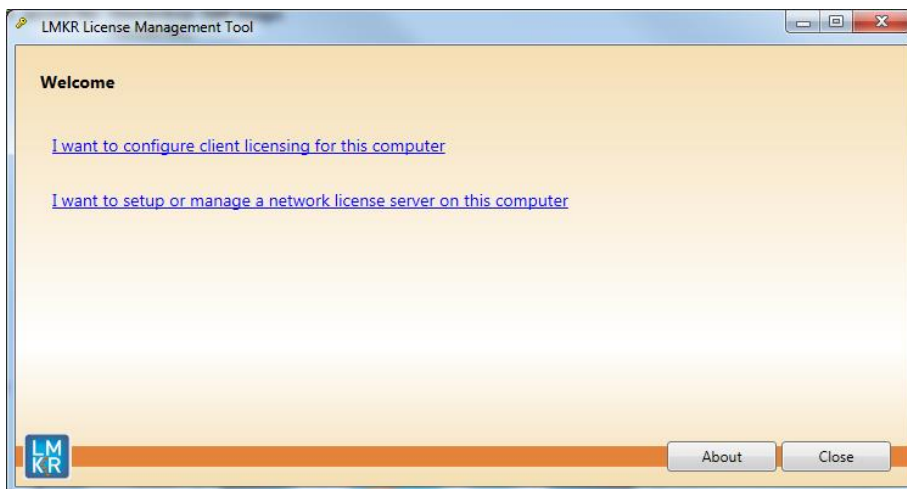

This section provides basic information on how to configure the license using the LMT. For detailed information on how to install the LMT and configure the application license, refer to the LMT Installation document.

Configuring the License

To configure the Geomodeling application license:

1. Obtain your license file from COS@lmk.com.
2. Download the LMT from the **LMKR Support Portal - Downloads** page (<http://support.lmk.com/>).
3. Install the LMT. Once installed, launch the LMT from **Start>>All Programs>>LMKR>>Licensing>>License Management Tool**.

The LMKR License Management Tool Welcome dialog displays.

4. In this dialog, you can either:

- Click **I want to configure client licensing for this computer** to [configure a client side license](#) on the current system.

Or

- Click **I want to setup or manage a network license server on this computer** to [setup a license server](#).

Configure a Client Side License

After clicking **I want to configure client licensing for this computer**, the Client Licenses dialog displays.

5. In this dialog, you can either:

- Click **Upload file** to [select a standalone client license file](#).

Or

- Click **Add Server** to [connect to an existing license server](#).

Select a Standalone Client License File

- Click **Upload File**, browse to select the license you received from LMKR, and then click **Open**.

The selected license displays.

- Click **Next**.

On successful license configuration, the 'Pass' message displays as shown in the image below.

Note: If an error occurs, please contact support@lms.com for assistance.

- Click **Done** when finished.

Connect to an Existing License Server

6. Click **Add Server**.

The Add Server dialog displays.

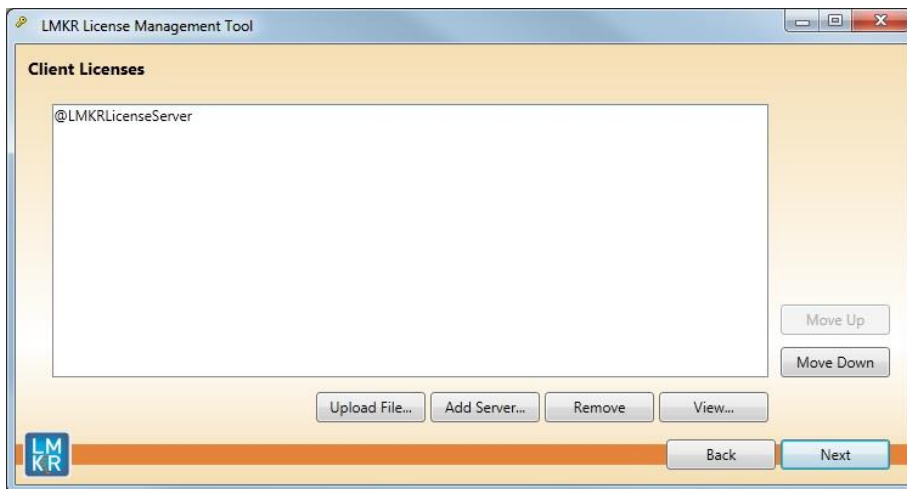

7. In this dialog, specify the following:

- **Port Number:** If a specific port is required, clear the **Auto** checkbox, and then enter the port number that matches the port number being used by the LMKR license server (contact your network administrator for more information).
- **Server Name:** Enter the name or the IP address of the license server

Note: By default, the Auto option is selected where the port is automatically detected. This option is used only when the license server uses a port from within the block of ports specific for Flexera FLEXnet Licensing ranging from 27000 to 27009.

8. Click **OK**.

The selected LMKR license server displays in this dialog.

9. Click **Next**.

10. Click **Done** once finished.

Setup a License Server

This is only performed on the system running the LMKR license server.

After clicking **I want to setup or manage a network license server on this computer**, the Update Service dialog displays.

The screenshot shows the 'Update Service' dialog box in the LMKR License Management Tool. The 'Service Name' is 'LMKR License Service'. The 'Port Number' is '0' and the 'Auto' checkbox is checked. The 'License File' field is empty, with 'Upload...' and 'View...' buttons. The 'Log File' is 'C:\ProgramData\LMKR\Licensing\LMKR License Service.log' with a 'Browse...' button. The 'Lmkr.exe' path is 'C:\Program Files\LMKR\Licensing\LMKR.exe' and the 'Lmgrd.exe' path is 'C:\Program Files\LMKR\Licensing\lmgrd.exe'. At the bottom, there are 'Back' and 'Next' buttons.

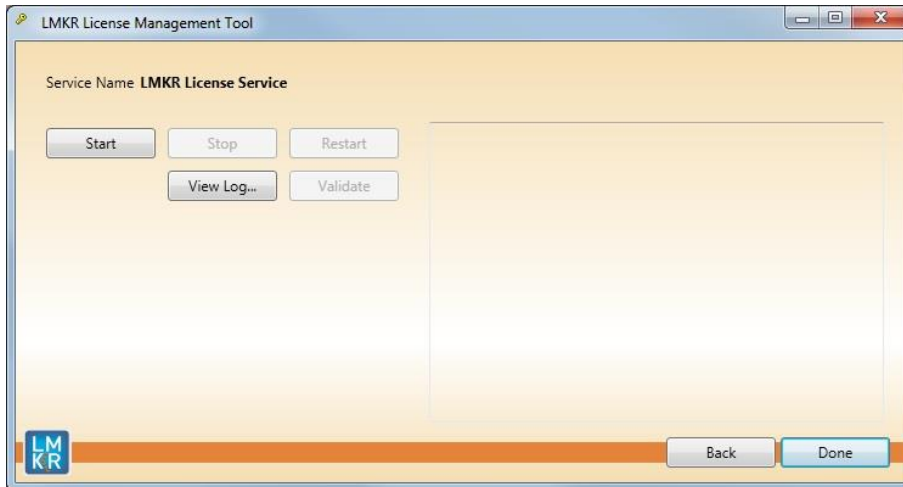

5. In this dialog, specify the following:

- **Port Number:** If a specific port is required by your network administrator, clear the **Auto** checkbox, and then enter the port number.
- **License File:** Click **Upload** to upload a new license file. The license file that is uploaded is renamed as Server.lic. This file is saved in the C:\ProgramData\LMKR\Licensing folder.
- **Log File:** Click **Browse** to select a location to save the log file.

The screenshot shows the 'Update Service' dialog box after configuration. The 'License File' field now contains 'C:\ProgramData\LMKR\Licensing\Server.lic'. The 'Upload From' field contains 'C:\Program Files\LMKR\Licensing\Discovery_counted_permanent_Server.lic'. The 'Next' button is highlighted in blue.

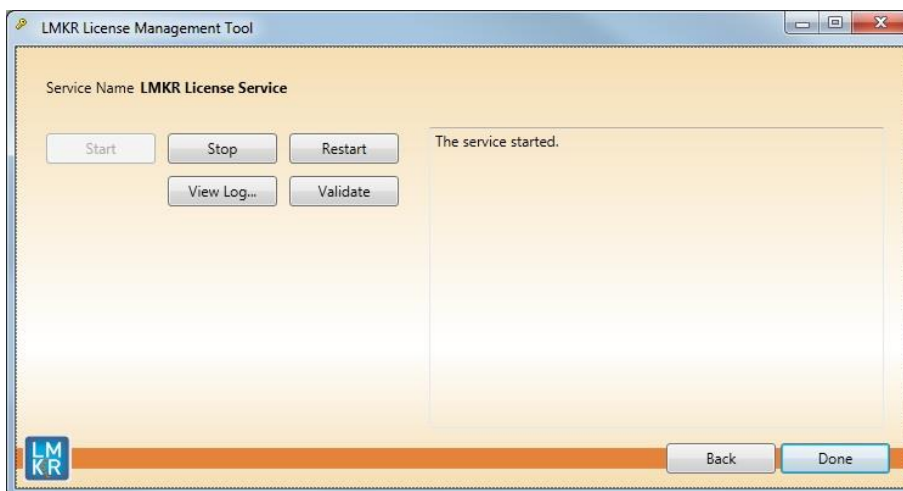

6. Click **Next**.

The LMKR License Server is then installed as a Windows Service.

7. Click **Start** to initiate the **LMKR License Service**.

The 'The service started' message displays on the dialog.

Note: If an error appears, contact support@lms.com for assistance.

8. Click **Done** once finished.

Contacting LMKR Support

LMKR is committed to providing the highest level of technical customer support in the industry. With an average tenure of more than thirteen years, our highly trained and experienced staff of technical analysts is comprised of geoscientists, engineers, land professionals, petrophysicists, and system specialists.

Please refer to our Customer Support timings mentioned below to ensure that you have access to our support analysts assigned to your region. When getting in touch with LMKR support, please remember that real-time support will not be available during bank holidays or after office hours. If you do get in touch with LMKR Support outside of work hours, please leave a voice message with a brief description of the issue that you are facing. Your voice message will be used to automatically create a support case for you. This will enable our analysts to attend to your issue and provide you with a resolution as soon as possible.
