Platform	Windows® 7, 10, or Server 2012 (64-bit)
Prerequisite Updates	GeoGraphix 2017.3 must be installed prior to the Hotfix installation
Supersedes Version	None
Compatible Release	2017.3
Build Number	N/A
Checksum (MD5) for HF1.zip	5955128880670078c931b09c2172f312

What's in this Release?

This hotfix addresses the smartSECTION and Geomodeling launch issue on Windows Server 2012. It should only be installed if you are using a server operating system, or if you access a server remotely and want to use GeoGraphix and/or GVERSE products directly on it.

Hotfix Dependencies

GeoGraphix 2017.3 must be installed prior to the hotfix installation.

Fixed Issues

GVERSE Geomodeling/smartSECTION

ID	Fix Description
169811	smartSECTION and Geomodeling did not launch on Windows Server 2012 and the assembly resolution code threw an exception when a UI theme related assembly was not found. This behavior is modified as per the documented guidelines and now if a particular assembly is not found, the software searches for the next available and suitable assembly for the UI theme.

Installation Instructions

To install this hotfix:

- 1. GeoGraphix 2017.3 must be installed.
- 2. Shutdown all running GeoGraphix 2017.3 applications and services.
- 3. Download the hotfix installer to a folder on your hard drive.
- 4. Extract the contents of HF1.zip.
- 5. Right-click **DeployHotFix.exe**, and then select **Run as Administrator** from the context menu.

Files Updated

1. ggx.CLRUtil.dll (32-bit & 64-bit) version 17.3.17861.1

Note: To view the file version, right-click the file, and select **Properties** from the context menu. The **Properties** dialog displays. Select the **Details** tab.

Support via Web Portal

You can also submit a support request directly to LMKR Customer Support by registering a case through the **LMKR Customer Support Portal**: http://support.lmkr.com

To request support in the LMKR Customer Support Portal:

- 1. In the main support page, **login** using your registered email and password. Please register your email before you access the site.
- 2. Select the **Case Management** tab or use the **Manage Cases** link on the main support page.
- 3. In the Case Management tab, click the Create a New Case link.
- 4. In the **Create Case** page, fill in the necessary information. Provide details about your technical concern, including any error messages, the workflow steps where the problem occurred, and attach screenshot that display the problem. You can also attach other files, such as example data files, which may help understanding the issue
- 5. Click the **Create Case** button. A support analyst in the nearest Technical Assistance Center will respond to your request.

We will ensure a quick and satisfactory answer to your query. If the problem cannot be resolved over the phone at the regional level, an escalation team will take over the resolution of your support case and will get back to you without delay.
