Checksum (MD5) for HF4.zip	2ba35ce5c7982a182ecea005f6435e8b

### What's in this Release?

This hotfix includes fixes for customer reported bugs.

### Hotfix Dependencies

GeoGraphix 2019.4.4 must be installed prior to the hotfix installation.

### Fixed Issues

#### GVERSE® Petrophysics

ID	Fix Description
233425, 233501	If data postings were not included while setting the top and bottom depth intervals, the log window froze and the user could not scroll up or down. This issue has been fixed.
233503	Alphanumeric characters could not be entered in the Perforation Diameter field. This issue has been fixed.
233643	While posting Perforation data on Diameter and Density fields, extra decimal zeroes (up to 6 digits) were added at the end. This issue has been fixed.

#### XSection

ID	Fix Description
233749	When the *.prt template having Completion/DST/Casing data postings was applied on the XSection cross section, and the data postings were not included while setting the top and bottom depth intervals, the XSection cross section window froze or the logs disappeared. This issue has been fixed.

## Installation Instructions

To install this hotfix:

1. GeoGraphix 2019.4.4 must be installed.
2. Shutdown all running GeoGraphix 2019.4.4 applications and services.
3. Download the hotfix installer to a folder on your hard drive.
4. Extract the contents of HF4.zip.
5. Right-click **DeployHotFix.exe**, and then select **Run as Administrator** from the context menu.
6. Select the deployed files, right-click and select **Properties** from the context menu.
7. In the Properties dialog, enable the **Unblock** check box. (Skip this step if the content is not blocked.)

## Files Updated

1. CurveAcc.dll version 19.4.19879.4
2. CurveAccLoaderGXDB.dll version 19.4.19879.4
3. LogRend.dll version 19.4.19879.4

**Note:** To view the file version, right-click the file, and select **Properties** from the context menu. The **Properties** dialog displays. Select the **Details** tab.

## DISCLAIMER

If you have any questions or encounter any problems, please visit the **GVERSE GeoGraphix Support website**: <https://gverse.com/support>

Or, contact Customer Support in your region. Refer to the section [Contacting LMKR](#) for details.

### *Support via Web Portal*

You can also submit a support request directly to LMKR Customer Support by registering a case through the **GVERSE GeoGraphix Customer Support Portal**: <https://gverse.com/support>

To request support in the LMKR Customer Support Portal:

1. In the main support page, **login** using your registered email and password. Please register your email before you access the site.
2. Select the **Case Management** tab or use the **Manage Cases** link on the main support page.
3. In the **Case Management** tab, click the **Create a New Case** link.
4. In the **Create Case** page, fill in the necessary information. Provide details about your technical concern, including any error messages, the workflow steps where the problem occurred, and attach screenshot that display the problem. You can also attach other files, such as example data files, which may help understanding the issue
5. Click the **Create Case** button. A support analyst in the nearest Technical Assistance Center will respond to your request.

We will ensure a quick and satisfactory answer to your query. If the problem cannot be resolved over the phone at the regional level, an escalation team will take over the resolution of your support case and will get back to you without delay.
